

TILE BOOK 2016

Desde sus inicios,

en 1977, la evolución de Rocersa ha venido marcada por un continuo esfuerzo en innovación, así como en el establecimiento de fuertes lazos, tanto comerciales como personales, con nuestros clientes.

Calidad y servicio son, para Rocersa, los pilares básicos sobre los que se ha asentado su actividad, y este nuevo catálogo es buena prueba de ello. En sus páginas encontrará un amplio abanico de materiales cerámicos desarrollados cuidadosamente para cubrir todo tipo de necesidades. Desde revestimientos de corte clásico y cuidado diseño hasta productos pioneros ganadores de prestigiosos galardones y reconocimientos, tanto por la tecnología aplicada como por el esfuerzo realizado en el aspecto más ecológico de su fabricación y, por supuesto, gres porcelánico de última gama.

Prepárese para disfrutar de la belleza y el diseño de estas colecciones, realizadas exclusivamente...

pensando en usted.

Its beginnings

in 1977, Rocersa has been characterised by its ongoing efforts in innovation as well as its commitment to establishing strong commercial and personal bonds with its customers.

Quality and service are the two main pillars on which Rocersa has based its approach, and this new catalogue is good proof of this. In the pages that follow, you will find a wide array of ceramic tile materials that have been carefully developed to meet all kinds of needs: from wall tiles with classic styling and artful designs to state-of-the-art products that have won prestigious awards and honours on the strength of the technology used and the efforts to ensure their ecological manufacture and, of course, leading-edge porcelain tiles.

Get ready to enjoy the beauty and design of these collections, which have been created

thinking of you.

El gres porcelánico de Rocersa representa un completo ejercicio de diseño aplicado a pavimentos y revestimientos cerámicos de la más alta calidad. Rocersa apuesta por la estética en todos sus productos, desarrollando nuevos efectos basados en las maderas, los cementos, las piedras y los colores más vanguardistas, ideales para cualquier estancia de interior o espacio exterior. Múltiples formatos, diferentes acabados, junto a las prestaciones técnicas intrínsecas del material cerámico, nos permitirá crear ambientes tranquilos y llenos de vida.

Gracias a los pavimentos y revestimientos de Rocersa es posible construir espacios llenos de estilo y personalidad. Desde sus espectaculares propuestas de pavimentos hasta los elegantes revestimientos. Con sus elaborados diseños y una amplia gama de elementos decorativos se pueden crear estancias repletas de lujo y diseño rico en matices. Piezas cuadradas, rectangulares, infinitas, oros, brillos, luz, todo ello en una misma e impresionante colección cerámica.

The Rocersa porcelain tiles represents a full year of design applied to wall and floor tiles of the highest quality. Rocersa commitment to aesthetics in all its products, developing new effects based on wood, cement, stones and avant-garde, ideal for any room interior or exterior spaces. Multiple formats, different finishes, together with the intrinsic technical performance of ceramic material, allow us to create peaceful and full of life environments.

Thanks to Rocersa floor tiles & wall tiles it is possible to construct full of style and personality spaces. From its spectacular proposals to elegant flooring tiles. With their elaborate designs and a wide range of decorative elements can create full luxury and design rich in nuances. Square, rectangular, endless pieces, gold, glitter, light, all in one impressive ceramic collection.

TECHNICAL INFORMATION

Rocersa presenta neoTech, una nueva forma de decoración digital cerámica que rompe totalmente con las técnicas de fabricación tradicionales. Se trata de una tecnología que utiliza procesos similares a los de las artes gráficas. Se imprime la cerámica de forma digital sin contacto directo con la pieza a partir de cuatro colores básicos cuya combinación permite obtener el resto de colores. La aplicación de esta tecnología digital se realiza tanto en el proceso productivo como en la concepción de los diseños. neoTech supone un avance tecnológico en el sector cerámico que traerá consigo una amplia gama de productos, texturas y colores mucho más reales y sorprendentes.

neoTech permite crear azulejos con una serie de características específicas que hace que cada pieza sea originalmente única gracias a estos aspectos:

- Más definición y variedad cromática: Con el sistema neoTech se obtiene una calidad de impresión fotográfica, lo que aporta mayor definición y variedad que cualquier otra forma de decoración conocida. Los nuevos efectos cromáticos consiguen piezas más naturales ya que la variedad cromática y la naturalidad que se obtiene es ideal para mejorar el aspecto de las piezas que imitan a la naturaleza.
- Diseños únicos: La tecnología neoTech permite crear infinidad de piezas diferentes, y hace posible que se trabaje con varios diseños a la vez.
- Decoración de distintos relieves: Decora simultáneamente sobre los relieves dando continuidad y realismo a los diseños. Permite decorar zonas con altos y bajos relieves con la máxima calidad y definición como si se tratara de zonas planas.
- Gran variedad de tamaños: Los tamaños de los diseños se amplían considerablemente consiguiendo una mayor diversidad y diferenciación entre las piezas.
- Impresión al límite: Se realiza la impresión del azulejo en toda su superficie vista. Se decora toda la superficie de la pieza, llegando hasta los bordes, de este modo se evitan los problemas que normalmente ocasiona el efecto ventana.
- Respeto al medio ambiente: Al reducir los residuos en esmaltes los productos fabricados con la tecnología neoTech son más respetuosos con el medio ambiente.

Rocersa is proud to present neoTech, a new digital tile printing system that represents a complete breakaway from conventional manufacturing techniques. The technology is based on processes similar to those used in the graphic arts. The surface is printed digitally with no direct contact with the tile, using four basic colours that can be combined to obtain all the other colours. This digital technology is used in both the production process and the creation of the designs. neoTech heralds a new step forward in tile-making technology, leading to the achievement of truly amazing, much more realistic products, textures and colours.

With neoTech, tiles with a series of specific characteristics can be created. This means that each tile is unique, thanks to the following benefits:

- *Better definition and a wider spectrum of colours: With neoTech, a photographic standard of printing is achieved, ensuring better definition and a wider variety of colours than any other known system of tile decoration. Thanks to neoTech's new chromatic effects, tiles with a more realistic natural effect can be achieved, because the wide range of colours and level of realism that this technology guarantees is ideal for tiles that are designed to emulate nature.*
- *Unique designs: With neoTech technology, endless different tiles can be created, and several designs can even be printed at the same time.*
- *Simultaneously printed reliefs: Any relief work on the tiles is simultaneously printed, so that the designs have more continuity and realism. Areas featuring high and low reliefs can be printed with the same quality and definition as flat areas.*
- *A wide variety of sizes: The size of the designs can be enlarged substantially to ensure a wider variety of different tiles.*
- *Printing right to the very edge: The tiles are printed across the whole visible surface, right to the very edge. This avoids problems normally associated with the window effect.*
- *Environmentally friendly: neoTech technology ensures a more environmentally-friendly system by reducing the amount of waste glazes.*

INFORMACIÓN TÉCNICA

PRODUCTOS RECTIFICADOS RECTIFIED TILES

1. No mojar las piezas previamente a su colocación pues pueden sufrir una ligera deformación que difi culte su colocación y su resultado fi nal. Colocar en seco. (Sobretudo revestimiento).
2. Maestrear correctamente la pared antes de su colocación pues cualquier rugosidad perjudica la colocación. El maestreo deberá hacerse con mortero y dejar fraguar, al menos, 48 horas.
3. Tras el fraguado, aplicar el cemento cola con llana dentada.
4. Pese a que el material rectifi cado se preste a una colocación sin junta, es aconsejable dejar una mínima distancia de 0'5 mm. con lo que evitaremos cualquier tipo de problema dimensional y eliminación de tensiones.
5. No golpear el material para colocarlo pues cualquier mínimo desajuste en la pieza provocaría un efecto no deseado haciendo que las puntas no coincidieran.
6. Se deben completar las paredes.
7. No transitar sobre los pavimentos recién colocados que pudieran provocar problemas como los descritos en el punto 5.
8. Tener mucho cuidado en la manipulación de las piezas ya que los bordes rectificados se prestan a una fácil rotura o despuntado por su canto vivo.
9. Rejuntar con llana de goma una vez seco el material.
10. La limpieza del rejunte deberá hacerse antes del secado de éste con una esponja húmeda.

1. *Do not dampen the tiles before laying them because they might become slightly warped, hindering the tile-laying process and affecting the end result. Lay them dry (particularly wall tiles).*
2. *Apply a proper levelling screed coat before the tiles are laid, because any rough patch will hinder the tile laying process. The mortar screed coat should be left to dry for at least 48 hours.*
3. *After the cement mortar has set, apply the cement-based adhesive with a notched trowel.*
4. *Although rectifi ed tiles can be laid without a tile joint, we advise you to leave a minimum of 0.5 mm between the tiles to avoid dimensional problems or stress.*
5. *Do not tap the tiles into place when you lay them, because any slight misalignment might lead to corners that do not coincide.*
6. *Tile the wall surface all in one go, without leaving sections for later.*
7. *Do not walk over recently laid fl oor tiles, as this may lead to the same problems described in point 5.*
8. *Be very careful when handling the tiles, because rectifi ed edges can easily break and the corners can also be knocked off, given their straight angles.*
9. *Grout the tiles with a rubber trowel once the material has dried.*
10. *Use a damp sponge to remove any surplus grouting from the tiles before the grouting material dries.*

VARIACIONES CROMÁTICAS CHROMATIC VARIATION

El producto está deliberadamente caracterizado por fuertes variaciones de colores y de vetas que permiten recrear la variedad y la riqueza de los materiales naturales que han inspirado algunas de nuestras colecciones. Por estas razones, durante la colocación del material, es aconsejable mezclar baldosas de diferentes cajas con el fin de garantizar que la superficie acabada tenga un aspecto variado. Las reproducciones de los colores en este Catálogo General se deben considerar como puramente indicativas.

The marked chromatic variation and the veining of the product is an intrinsic feature and re-creation of the randomness and richness of the colour shading of natural stone, the inspiration behind this collection. For these reasons, we recommend installing the product choosing tiles from different boxes in order to guarantee an extremely natural random effect. Due to these intrinsic features of the product, the colours represented in this catalogue must only be considered an example of the many possible colour shades.

TECHNICAL INFORMATION

CONSEJOS DE COLOCACIÓN

LAY OUT SUGGESTIONS

1. La colocación trabada en formatos rectangulares (sobre todo en gres porcelánico), tendencia actual muy usada en la colocación de estos tipos de materiales, no debe hacerse nunca al 50% con el fin de evitar una posible aparición de cejas que pudieran provocar escalones con el consecuente riesgo de tropezar así como un efecto de sombreado poco estético al ver el material desde cierta perspectiva. Se recomienda reducir esta traba a valores no superiores al 25%.
2. En la colocación en capa fina (cementos cola) nunca mojar las piezas.
3. Se recomienda nivelar las superficies antes de la aplicación de los productos adhesivos (morteros, cementos cola, etc.).
4. Se recomienda una junta de colocación mínima de 1'5 mm. con el fin de absorber las posibles tensiones derivadas en la obra, a excepción de los productos rectificados. (ver productos rectificados).
5. Es necesario respetar las juntas estructurales, perimetrales y de dilatación.
6. Con el fin de evitar posibles reclamaciones sobre material ya colocado, se recomienda abrir varias cajas y extender el material de las mismas en el suelo antes de su colocación con el fin de que el producto sea conforme a las exigencias para las que fue adquirido, es decir, verificación de tonos, dimensiones o cualquier defecto superficial repetitivo que pueda aparecer empeorando la calidad final del producto. Se recuerda que, como norma general, no se admitirán reclamaciones sobre material ya colocado.
7. En el caso del gres porcelánico, para el corte del mismo se aconseja la utilización de cortadora eléctrica refrigerada por agua, con discos para porcelánico. Para hacer agujeros sobre dicha superficie, y como consecuencia de la dureza y compactación de este tipo de material, se recomienda el siguiente método:
 - Utilizar brocas para porcelánico.
 - No utilizar percutor en el taladro.
 - Taladrar a baja revolución.
 - Comenzar por una broca fina y taladrar posteriormente con la broca final.
 - Refrigerar la broca con agua mientras se taladra.
8. Salvo en manchas especiales, recordar que la mejor manera de limpiar cualquier tipo de producto cerámico es con agua y un jabón o detergente común.
9. Se aconseja consultar la tabla de características técnicas de cada modelo para elegir el producto adecuado para el uso que se le va a dar y según para que tipo de colocación sea: interior/exterior, tránsito bajo/medio/alto, riesgo a la presencia de sustancias químicas, zonas húmedas, etc.

1. When staggering rectangular tiles (particularly porcelain ones) – a tile-laying pattern that is very much in vogue when using this type of material –, never stagger them halfway along the tiles in the previous row. This might create an uneven rim that causes people to trip, together with a rather unattractive shaded effect when viewed from a certain angle. We advise you to stagger the tiles up to a quarter of the length of the tiles in the previous row.
2. When using the thin-bed tile laying method (with a cement-based adhesive), never dampen the tiles first.
3. Level the surface of the substrate before applying adhesive products (mortar, cement-based adhesive etc).
4. A joint width of at least 1.5 mm should be used in order to absorb any stress, except in the case of rectified tiles. (See rectified products).
5. All necessary structural, perimeter and expansion joints must be maintained.
6. In order to avoid possible complaints once the material has been laid, several boxes should be opened and the tiles should be spread onto the floor before laying them to make sure that they meet your requirements. That is, so that you can check the shade, their dimensions and look for possible repeated surface defects that might diminish the quality of the end result. Remember that, as a general rule, complaints will not be admitted once the tiles have been laid.
7. In the case of porcelain tiles, we advise you to use a water-cooled electric tile saw with blades for porcelain tiles.

Given how hard and how compact porcelain tiles are, to perforate the surface, we advise you to use the following method:

- Use drill bits for porcelain tiles.
 - Do not use the percussion mode on the drill.
 - Drill at a low speed.
 - Start with a thin drill bit through to the final one.
 - Refrigerate the drill with water as you drill.
8. With the exception of special stains, remember that it is best to clean ceramic tiles of all kinds with soap or a normal detergent and water.
 9. Consult the table of technical characteristics for each tile model in order to choose the product that best suits the required use and conditions. That is, for indoor or outdoor environments; low, medium or high traffic; environments subject to chemical attack or water, etc.

INFORMACIÓN TÉCNICA

PRODUCTOS RECOMENDADOS PARA EXTERIORES (ANTIHELO) *RECOMMENDED (FROST PROOF) TILES FOR OUTDOOR ENVIRONMENTS*

1. En colocaciones exteriores, y más aún si las condiciones meteorológicas pueden llegar a ser extremas, se recomienda únicamente la colocación de productos pertenecientes al grupo BI (gres porcelánico) siendo el más aconsejado el grupo BIa por su absorción de agua inferior al 0'5%.
2. Previamente a la colocación del material, se debe nivelar perfectamente la superficie con pasta niveladora o mortero, formando las pendientes necesarias (2%) que impidan el estancamiento de agua, evitando así la formación de hielo con el correspondiente riesgo de rotura del material. Se recomienda, en terrazas o zonas descubiertas, la impermeabilización y drenaje conectado a sumidero por debajo del solado. Se recomienda el uso de juntas impermeables.
3. Utilizar el cemento cola correspondiente para material con baja absorción de agua y junta impermeable que impida el paso de agua por la misma, impidiendo así el filtrado evitando así, como en el punto anterior, la rotura del material como consecuencia de la formación de hielo. Asimismo, la junta mínima de colocación de 1'5 mm. sigue siendo la recomendada.
4. Hay que realizar juntas de dilatación en todo el perímetro cada 6-9 m² y respetar las juntas de dilatación estructurales.
5. Debe utilizarse siempre llana dentada en la aplicación del cemento cola y macizar mediante golpes con maza de goma. No deben quedar huecos bajo la superficie de la pieza, es decir, debe estar totalmente macizada.
6. En colocaciones de pavimentos en exterior, estos deben cumplir unos requisitos mínimos de antideslizamiento. Estos requerimientos son diferentes para cada país estando vigentes distintos métodos de control del antideslizamiento como pudieran ser el Tortus, el péndulo o la rampa o plano inclinado.
7. No colocar en zonas permanentemente húmedas o susceptibles de tener presencia de humedad materiales que no cumplan con las especificaciones técnicas requeridas para este tipo de zonas.

1. *When laying tiles in outdoor environments, particularly when subject to extreme weather conditions, we advise you only to lay tiles classified as belonging to group BI (porcelain tiles). The most suitable ones are group BIa tiles since they have a water absorption rate of less than 0.5%.*
2. *Prior to laying the tiles, use a levelling screed to create a perfectly level surface and form any necessary (2%) slopes so that water runs away, thus avoiding the formation of ice which may cause the tiles to crack. On terraces or in unprotected areas, it is advisable to waterproof the substrate and ensure that any water runs off into a drain under the paving. Waterproof joints should be used.*
3. *Use a cement-based adhesive for tiles with a low water absorption rate and waterproof tile joints to prevent water from filtering through and the tiles from cracking due to the formation of ice, as described above. Likewise, a minimum joint width of 1.5 mm is advisable.*
4. *Expansion joints must be included around the perimeter every 6-9sqm, and all structural expansion joints must be maintained.*
5. *Always use a notched trowel to apply cement-based adhesive. Use a rubber mallet to secure the tiles. No gaps must remain under the surface of the tiles.*
6. *When laying tiles in outdoor environments, they must fulfil minimum non-slip requirements. These requirements differ from country to country, with different non-slip tests being used, such as the Tortus, pendulum, or inclined ramp methods.*
7. *Do not use tiles that do not meet the required technical specifications in areas that are permanently wet or subject to damp.*

TECHNICAL INFORMATION

SUELOS ANTIDESLIZANTES

ANTI-SLIP FLOORING

La seguridad en la utilización de los pavimentos es una de las prioridades de ROCERSA. Actualmente existen en el ámbito internacional varios sistemas para evaluar la resbaladicidad de los materiales. Los ensayos que ROCERSA aplica a sus pavimentos son los siguientes:

El metodo de rampa inclinada, de amplia difusión en toda Europa, consiste en una plataforma regulable en inclinación sobre la que camina un técnico cualificado calzado con suela normalizada o pie descalzo. Esta rampa, que se encuentra lubricada con aceite o agua jabonosa respectivamente, incrementa progresivamente el ángulo respecto a la horizontal hasta que el técnico detecta indicios de deslizamiento. En el caso de calzado y aceite como lubricante los pavimentos se clasifican en cinco categorías, R9 a R13, donde el número mayor indica una fricción estática también mayor.

Clasificación	Ángulo de inclinación	Adecuado para zonas con:
R9	3° - 10°	
R10	10° - 19°	Fricción estática NORMAL
R11	19° - 27°	Fricción estática AUTOMÁTICA
R12	27° - 35°	Fricción estática ALTA
R13		Fricción estática MUY ALTA

El método del péndulo de fricción, prescrito por el Código Técnico de la Edificación, consiste en un péndulo de medidas normalizadas que soporta un deslizador de caucho. La altura del equipo se ajusta para conseguir que el deslizador, que soporta una carga constante, mantenga el contacto con la superficie durante una distancia conocida. Midiendo la diferencia entre la altura inicial y la alcanzada por el péndulo después de la fricción, se asigna un valor a la superficie ensayada. Los suelos analizados con este sistema se clasifican en 4 categorías, de la 0 a la 3, donde un número mayor indica una mayor resistencia al deslizamiento.

Clasificación	Ángulo de inclinación	Adecuado para zonas con:
CTE 0	Rd ≤ 15	
CTE 1	15 > Rd ≤ 35	• Interiores con pendientes < 6%
CTE 2	35 Rd ≤ 45	• Interiores con pendientes P 6% y escaleras • Interiores húmedos (duchas, aseos, cocinas, etc.) con pendientes < 6%
CTE 3	Rd > 45	• Interiores húmedos (duchas, aseos, cocinas, etc.) con pendientes P 6% • Interiores húmedos con grasas, aceites, etc. • Exteriores y piscinas

Safety in the use of flooring is one of the Rocersa's priorities. There are currently several systems to be found in the international field for the evaluation of floor slipperiness. ROCERSA applies the following tests to its floorings:

The ramp test which is widely used throughout Europe consists of an adjustable sloping platform on which a qualified technician either walks wearing footwear with a standard sole or walks barefoot. This ramp, which is lubricated with oil or soapy water, respectively, progressively increases the angle in regard to the horizontal until the technician notices some indications of slipping. In the case of footwear and oil as lubricant, the floorings are classified in five categories, R9 to R13, where a higher number also indicates a greater friction.

Classification	Angle of inclination	Appropriated for areas with:
R9	3° - 10°	
R10	10° - 19°	NORMAL static friction
R11	19° - 27°	INCREASED static friction
R12	27° - 35°	HIGH static friction
R13		VERY HIGH static friction

The friction pendulum method, prescribed by the Technical Building Code, consists of a pendulum of standardised dimensions, with a rubber slider. The height of the device is adjusted to assure that the slider, which bears a constant load, keeps contact with the surface over a known distance. Measuring the difference between the initial height and the height reached by the pendulum after the friction, provides a value that is assigned to the tested surface. The floors analysed with this system, are classified into 4 categories, from 0 to 3, the higher number indicating a greater slip resistance.

Classification	Angle of inclination	Appropriated for areas with:
CTE 0	Rd ≤ 5	
CTE 1	15 < Rd ≤ 35	• Interiors with slopes < 6%
CTE 2	35 Rd ≤ 45	• Interiors with slopes greater than P 6% and stairs • Wet interiors (showers, toilets, kitchens, etc.) with slopes < 6%
CTE 3	Rd > 45	• Wet interiors (showers, toilets, kitchens, etc.) with slopes P 6% • Wet interiors with grease, oils, etc. • Exterior and swimming pools

En el caso del metodo del pie desnudo y agua jabonosa la clasificación se reduce a tres gradaciones, A, B y C en la que la primera corresponde a ángulos de rampa mayores o iguales a 12° y la clase C a ángulos mayores o iguales a 24°.

Clasificación	Ángulo de inclinación	Adecuado para zonas con:
Clase A	≤ 12°	• Zonas de paso de andar descalzo • Vestuarios individuales y comunes • Suelos de piscinas en zonas que no son de natación si la profundidad del agua > de 80 cm.
Clase vB	≤ 18°	• Zonas de paso de andar descalzo no clasificadas en el grupo A • Zonas de instalación de pulverización desinfectante. • Suelos de piscinas en las zonas que no son de natación, si la profundidad es mayo de 80 cm. • Secciones que no son de natación en piscinas de oleaje • Suelos móviles • Piscinas infantiles • Escaleras que se meten en el agua • Escaleras que se meten en el agua a una profundidad máxima de 1 metro con barandillas a ambos lados. • Escaleras fuera de la zona de baño
Clase C	≤ 24°	• Escaleras que se meten en el agua no clasificadas en la clase B • Piscinas que se atraviesan nadando • Diseño de bordes de piscina inclinados.

Es de señalar que al aumentar la rugosidad de la superficie tiende a mejorar la fricción, pero al mismo tiempo aumenta la tendencia a la suciedad. Por otra parte, el uso de relieves superficiales antideslizantes puede provocar ligeras molestias al caminar sobre ellos, por lo que esta solución suele utilizarse en aquellas aplicaciones en las que resulta prioritaria la seguridad frente al resto de condicionantes (uso industrial, aceras exteriores, etc.).

In the case of walking barefoot and soapy water, the classification is reduced to three classes, A, B, and C in which the first corresponds to ramp angles smaller than or equal to 12° and class C to ramp angles larger than or equal to 24°.

Clasificación	Ángulo de inclinación	Adecuado para zonas con:
A Class	≤ 12°	• Walking areas for barefoot walking areas • Individual and common changing rooms • Swimming pool floors in areas not for swimming but in which the water depth > 80cm.
B Class	≤ 18°	• Barefoot walking areas not classifi ed in group A • Areas of disinfectant spraying facilities • Swimming pool fl oors in areas not for swimming but in which the water depth exceeds 80cm. • Sections that are not for swimming pools • Movable floors • Children's swimming pools • Stairs that enter the water • Stairs that enter the water to a maximum depth of 1 metre, with railings on both sides • Stairs outside the bathing area
C Class	≤ 24°	• Stairs that enter the water not classifi ed in class B. • Swimming pools that are crossed by swimming. • Swimming pool sides with sloping edges

It should be noted that increased surface roughness tends to improve friction, but, at the same time, increases the tendency to retain dirt. On the other hand, the use of anti-slip surface profiles may be uncomfortable for the user, which is why this solution is usually used in applications in which safety is the top priority, compared with the other conditioning factors (industrial use, outside pavements, etc.).

TECHNICAL INFORMATION

CONDICIONES GENERALES DE VENTA

GENERAL SALE TERMS

1. La mercancía viaja por cuenta y riesgo del comprador.
2. Los colores de catálogo e ilustraciones son puramente orientativas de la gama.
3. Nuestros materiales están sujetos a tonalidad y a las tolerancias que establece la norma ISO 13.006 / EN 14411.
4. No se responde de las reclamaciones sobre material ya colocado.
5. Nuestras garantías obedecen sólo a la reposición de material sin colocar.
6. Nos reservamos la facultad de cambiar nuestros precios con un preaviso de 30 días.
7. Los pagos se efectuarán directamente a Roig Ceramica SA (Rocersa), excepto en los casos en que deleguemos por escrito a personas autorizadas.
8. El retraso en 30 días a la fecha de cobro será sancionado como insolvencia. En tal caso será de nuestra facultad suspender los pedidos pendientes y por ello pedir judicialmente el pago de lo debido. Todos los gastos ocasionados por la demora, serán por cuenta del deudor.
9. Sobre la mercancía que ocupará cada factura, Roig Ceramica SA (Rocersa), se reserva el derecho de dominio hasta no haya sido cobrado el importe de la misma incluso sobre las transacciones a terceros.
10. En caso de litigio ambas partes se someterán a los Juzgados y Tribunales de Castellón (España).

ENTREGA: Todas las mercancías se consideran como recibidas y aceptadas en fábrica. Se expedirán por orden, cuenta y riesgo del comprador. Las faltas de peso o rotura deben reclamarse a las Compañías de Transportes, únicas responsables.

1. *The merchandise is sent at buyer's risk and account*
2. *The colour and images of the series shown in the catalogue are purely orientative*
3. *Our products are subject to shade and caliber variation, as well as tolerances as per the european norm in force ISO 13.006 / EN 14411.*
4. *We will not be held responsible for any items once these have been laid out*
5. *Our guarantee applies only for tiles that are not installed*
6. *We reserve the rights to change prices with a previous 30 day notice.*
7. *Payment are strictly made to Roig Ceramica SA (Rocersa), except in those cases when we delegate in writing to be effected to an authorized person.*
8. *Any overdue payments for 30 days will be considered as insolvency, and in such a situation we reserve the rights to put any pending orders on hold, and take legal action if considered convenient, and all expenses incurred will be at debtor's account.*
9. *The goods listed on every invoice remain property of Roig Ceramica SA (Rocersa), until these have been cleared in full, this applies to any transactions made with agents or third parties too*
10. *In case of litigation this will be submitted trough the court of justice in Castellon.*

DELIVERY: All the goods will be considered as accepted & received by the customer once these leave the factory, and these will be sent by order of the customer and at his own account and risk any breakage or missing items are to be claimed to the transport company
Carriers are responsible for breakage and / or underweight / overweight

1. Die Ware wird auf eigene Gefahr des Käufers verfrachtet.
2. Die Farben in unsere Prospekten und Kataloge dienen nur zur Orientierung.
3. Unser Material entspricht in Brand und Toleranz der aktuellen Norm (ISO 13.006 / EN 14411)
4. Reklamationen nach Verlegen des Materials werden nicht akzeptiert.
5. Unseren Garantien und somit Ersatzlieferungen sind nur gültig, wenn das Material noch nicht verlegt wurde.
6. Wir behalten uns das Recht vor, unsere Preise mit einem Voravis von 30 Tagen zu ändern.
7. Die Rechnungen werden direkt an Roig Ceramica SA (Rocersa), bezahlt, außer wenn wir schriftlich eine bestimmte Person damit beauftragen.
8. Eine Verspätung der Zahlung in mehr als 30 Tagen, wird als Zahlungsunfähigkeit von Seitens des Kunden betrachtet. In diesem Fall werden laufenden Bestellungen storniert und der Gesamtbetrag gesetzlich eingetrieben. Jeglich verursachte Kosten sind vom Schuldner zu tragen.
9. Bis zur vollständigen Bezahlung der Rechnung reserviert sich Roig Ceramica SA (Rocersa), das vollständige Eigentumsrecht vor. Dies beinhaltet auch Verhandlungen mit Dritten Personen.
10. Im Streitfall ist für beide Parteien der Gerichtshof in Castellon (Spanien) zuständig.

ANLIEFERUNG: Die Ware wird im Werk übernommen und auf Risiko des Käufers verfrachtet. Fehlende Gewichte oder Schäden des Materials müssen direkt an den Spediteur reklamiert werden, da diese die einzigen Verantwortlichen sind.

1. La marchandise voyage aux risques et périls de l'acheteur.
2. Les coloris de nos catalogues et illustrations sont uniquement une orientation de notre gamme.
3. Nos produits s'adaptent aux tolérances données par les normes ISO 13.006 / EN 14411 établies.
4. Nous ne pouvons accepter de réclamation de nos produits après sa pose, s'il existe un problème de qualité apparent.
5. Nos garanties ne sont valables, en cas de défaut, que pour les produits non posés.
6. Nous nous réservons le droit de modifier nos prix et tarifs avec un préavis de 30 jours.
7. Les paiements s'effectueront directement à Roig Ceramica SA (Rocersa), sauf quand la Société donne l'autorisation par écrit à une autre personne.
8. Un retard de règlement supérieur à 30 jours à la date accordée sera considéré comme manque de solvabilité de la part du client, sauf preuve du contraire. Les commandes en cours seraient paralysées ou annulées. Le règlement pouvant être réclamé par VOIE JUDICIAIRE, tenants comptes des frais d'agios et autres.
9. Roig Ceramica SA (Rocersa), se réserve le droit de propriété, selon la LOI NUM 80.325 du 2 mai 1980, jusqu'à complet paiement de pouvoir faire des poursuites aux tierces personnes.
10. En cas de litige, seul le Tribunal de Castellon (Espagne) est compétent.

La marchandise est vendue au DEPART USINE d'où elle est chargée dans de bonnes conditions, celle-ci ne pourra faire l'objet de réclamations dans le cas de casse ou autres causes similaires qu'au TRANSPORTEUR correspondant.

Todas las informaciones, datos y características técnicas que aparecen en este catálogo, fueron acumulados hasta la edición del mismo (Enero de 2013). El fabricante se reserva el derecho de introducir las modificaciones y cambios que considere necesarios en beneficio del producto y del cliente.

En caso de duda, o confrontación de informaciones, éstas deben ser confirmadas a través de la empresa o el agente que la represente, ya que los datos que aparecen en este catálogo no se considerarán vinculantes.

El contenido de este catálogo está protegido en su totalidad por Copyright. Queda prohibida la reproducción total o parcial de las imágenes, textos, ilustraciones y conceptos gráficos sin la autorización expresa de Rocersa Cerámica, S.A.

Debido a los procesos técnicos de reproducción, los colores son aproximados, no exactos.

This catalogue contains all the information, details and characteristics available at press time (January 2014). The manufacturer, however, reserves the right to introduce modifications or changes as deemed appropriate for product improvement and the benefit of customers.

In case of doubt or faced up information, this must be confirmed by the company or the agent that represents it, because the information contained in this catalogue will not be considered binding.

The entire contents of this catalogue are copyright. No pictures, text, illustrations or graphic concepts may be reproduced, either wholly or partially, without the express permission of Rocersa Cerámica, S.A.

Due to the technical process of reproduction, colours printed are approximate, not exact.
